

Universidad Nacional de Rafaela (UNRaf)

GENERATING NEW ANSWERS FOR THE CHALLENGES OF A COMPLEX WORLD

The societies that move forward have in mind that they need to strengthen two aspects of their functioning: creating conditions for the development of their own technological capacities and favouring the integral formation of the citizens enabling the innovation and creative thinking processes that allow the production of sustainable alternatives to overcome the collective challenges. In a world with a constant process of transformation, these conditions are indispensable for the sustained growth over time and to reduce the effects of volatility in markets and the changes in the geopolitics diagram.

We thank the international community for the opportunity offered to us of integrating the global map of universities, institutions and companies in every Nation. We take advantage of the opportunity to invite you all to our dear Rafaela city, in Argentina or to contact us through the possibilities that current communications give us.
